Beställning av AE-test hos Labogen

Gå in på <https://shop.labogen.com/en/>

Välj språk

När man beställer testkit i samband med beställning av AE-analys får man 2 provrör per katt. Då en del katter kan råka bita av svabbpinnen rekommenderas därför att beställa testkit utan konto också (utan att logga in). Du får även här 2 provrör per katt. Testkiten är helt gratis.

Har du katt på foder eller inte kan testa alla dina katter samma dag är det bra att ha beställt extra testkit då även påse att posta provrören med svabbarna i kommer med.

Testkit som beställdes utan kontoinloggning kom med vanliga posten efter några arbetsdagar. Testkit i samband med AE-test kom med DHL, hemleverans (dagtid). Det är möjligt att det är olika beroende på var man bor. Men bra att ha i åtanke.

FÖR ATT BESTÄLLA TESTKIT UTAN KONTO (ej inloggad)

Gå på "Genetic test information" i menyn och välj Testkits (längst ner)

The screenshot shows the LABOGEN website interface. At the top, there's a navigation bar with links: Genetic test information, Order genetic test, Breeder information, Contact, and FAQ. A blue arrow points from the text above to the 'Genetic test information' link. Below the navigation bar, a dropdown menu is open for 'Genetic test information', showing options: Genetic diseases, Coat colours / Length, DNA-Profiling, Sex determination in birds, Admission forms, and Testkits. The 'Testkits' option is circled in blue. To the right of the dropdown, there's a graphic showing paw prints and a graph. Further right, there's a 'NEW at LABOGEN' section with two items: 'Dilated cardiomyopathy (DCM) Dobermann' and 'Genetic variability (heterozygosity)'. At the bottom, there's a banner with images of various animals (horses, dogs, cats) and a 'For Veterinarians' section with a red 'i' icon.

Fyll i efterfrågad information i rutorna nedan

If you prefer not to use the online shop you can order testkits here - uncomplicated and free of charge. To send you the material by post it is necessary to provide your complete address and the quantity of animals to be tested.

FÖR ATT REGISTRERA KONTO OCH BESTÄLLA AE-TEST

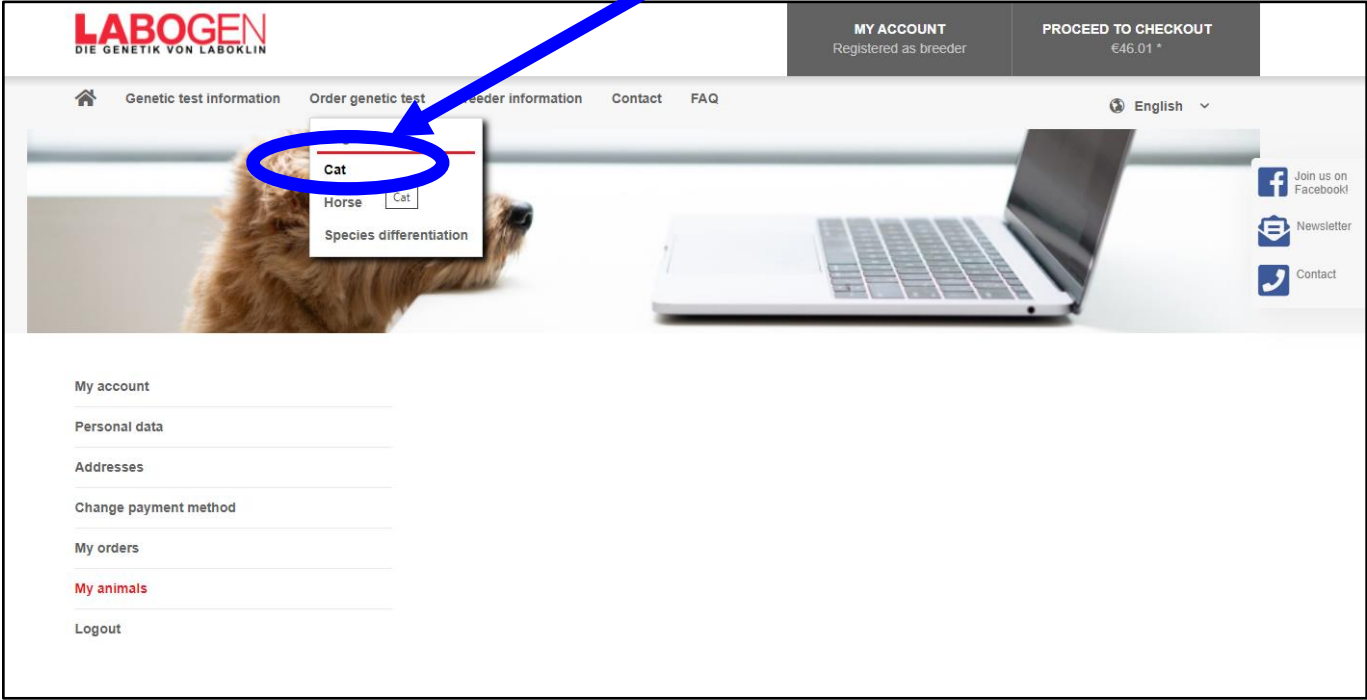

Klicka på "MY ACCOUNT"

Välj "Registration pet owner"

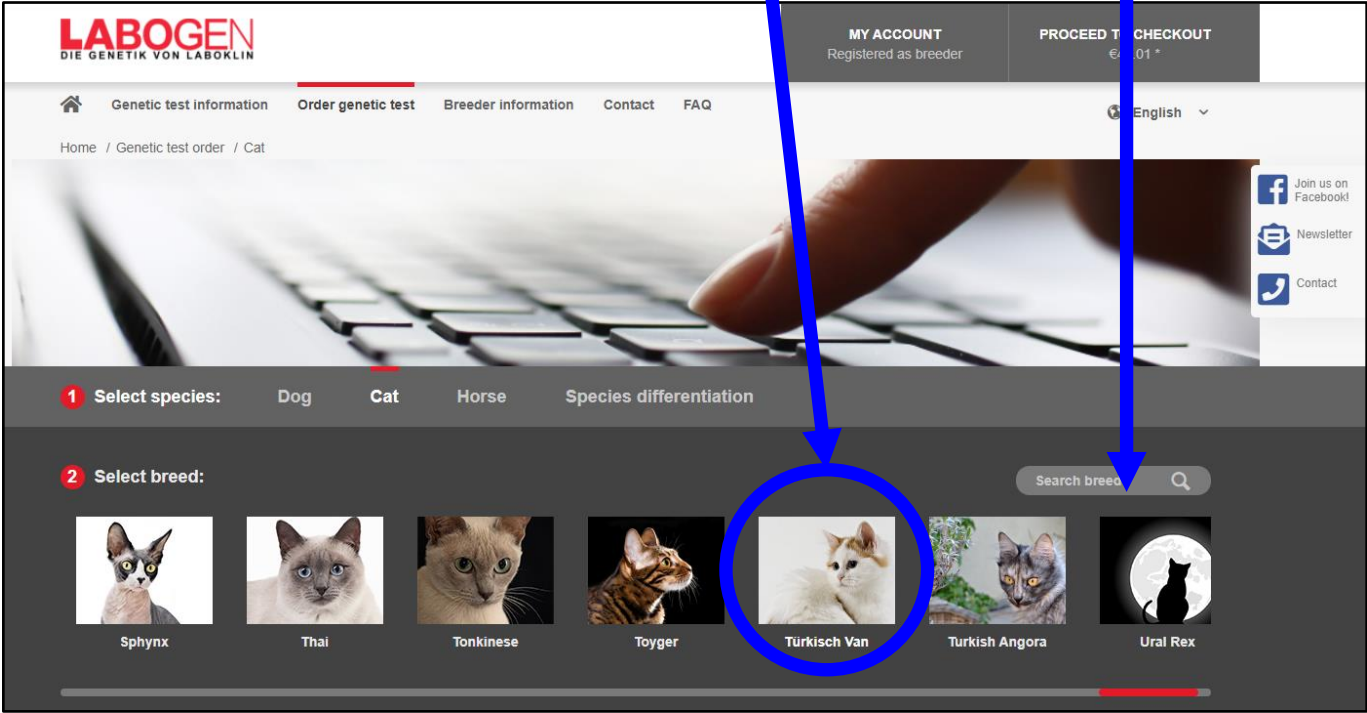

Klicka på "Send registration"

Sid 5 av 13

Gå in på "Order genetic test" och välj "Cat"

Välj därefter ras antingen genom sökfunktionen eller scrolla till "Turkish van" bilderna

Punkt 3: Klicka i "8763 – Acrodermatitis enteropathica (AE)"

3 Select genetic test:

Genetic diseases

Sample material: 0.5 – 1.0 ml EDTA blood or 2 x cheek swab (dog & cat) / approx. 20 mane-/tail hair (horse)

Sampling information

- | | |
|--|---------|
| ☒ 8763 - Acrodermatitis enteropathica (AE) | €46.01* |
| <small>Affected kittens develop normal until 6 weeks of age. At the age of 6-8 weeks, they show growth retardation and diarrhea. Moreover, they suffer from severe and rapidly progressing dermatological signs like scaling, alopecia, moist dermatitis as well as severe erosions and lesions with ventral and distal distribution. Massive secondary infections can be found on the skin lesions.</small> | |
| ☐ 8350 - Combi: Genetic diseases cat | €68.00* |
| ☐ 8604 - Cystinuria | €46.01* |
| ☐ 8121 - Genetic blood group determination | |
- [Show all tests \(for all breeds\)](#)
- | | |
|---|---------|
| ☐ 8090 - Agouti | |
| ☐ 8242 - Albino | €46.01* |
| ☐ 8257 - Brown (chocolate/cinnamon) | €46.01* |
| ☐ 8778 - Coat colour variant Tabby (Mackerel, Blotched) | €46.01* |
| ☐ 8777 - Coat colour variant Ticked | €46.01* |
- [Show all tests \(for all breeds\)](#)
- If at least 2 colours are required, we charge full price for the first colour and 20,00 euro* for each additional colour (partner laboratories not included).

När du klickat på valt test under punkt 3 kommer din "shopping cart" fram. Klicka bort den så du kan klicka i under punkt 4 (om du behöver).

DNA profile / Identity

Sample material: 0.5 – 1.0 ml EDTA blood or 2 x cheek swab (dog & cat) / approx. 20 mane-/tail hair (horse)
The test can only determine breeds from our database.

Sampling information

[Show all tests \(for all breeds\)](#)

4 Do you need shipping materials?

- ☒ **Yes, please send me free shipping materials for my samples.**
For the shipment of blood samples taken by the vet no test kit is needed. The test kit contains amongst other things two cotton swabs for sampling.

Punkt 4: Här kan du fylla i för att få testkit hemskickat, om du inte redan har.

Så här ser mailbekräftelsen ut med 2 bifogade filer per katt.
En med all information och en med streckkoden som ska klistras på provröret (glöm inte att det är 2 provrör per katt).

Your LABOGEN order 1C

Linköping

19:44 (för 11 minuter sedan)

LABOGEN

Dear Mr Levil Karlsson,

Thank you for your order with LABOGEN.EN (Number: 100...) lay 2022 at 19:44.

IMPORTANT NOTE: Attached is the test order and a barcode (as a PDF file) for identifying your sample. The barcode must be printed out and affixed to the sample (e.g. with sticky tape or on self-adhesive labels). The test order must also be printed out and enclosed with the sample. If you ordered a certificate, you must have the sampling performed and confirmed (signature/stamp) by an independent person (veterinarian or breed warden).

Please send the sample with sufficient postage affixed to the following address:
LABOKLIN GmbH & Co KG, Steubenstraße 4, 97688 Bad Kissingen, Germany
