# Beställning av AE-test hos Labogen

#### Gå in på https://shop.labogen.com/en/

När man beställer testkit i samband med beställning av AE-analys får man 2 provrör per katt. Då en del katter kan råka bita av svabbpinnen rekommenderas därför att beställa testkit utan konto också (utan att logga in). Du får även här 2 provrör per katt. Testkiten är helt gratis.

Har du katt på foder eller inte kan testa alla dina katter samma dag är det bra att ha beställt extra testkit då även påse att posta provrören med svabbarna i kommer med.

Testkit som beställdes utan kontoinloggning kom med vanliga posten efter några arbetsdagar. Testkit i samband med AE-test kom med DHL, hemleverans (dagtid). Det är möjligt att det är olika beroende på var man bor. Men bra att ha i åtanke.
